Skills

- **Programming Language:** C, C++, JavaScript, TypeScript, Python
- **Frontend:** React.js, Next.js, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Express.js, Flask, REST APIs, JWT, WebSocket, WebRTC
- **Machine Learning:** PyTorch, CNNs, RNN, Transformers, KNN, Decision Tree, Neural Networks, NLP, Langchain
- **Databases:** SQL, MongoDB, SQLAlchemy, Mongoose, Supabase
- **Cloud & Tools:** AWS (S3, Lambda, EC2), Git, GitHub
- **Other:** Data Structures & Algorithms, OOPs, Chrome Extension Development

Work Experience

React Developer Intern

Jun 2025 - May 2026

[Appeneure Technologies, Noida](#)

- Worked on **Note In Tabs**, a Chrome extension for seamless note-taking across browser tabs, reaching over **100 users**.

Education

- **B.Tech. in Computer Science and Engineering (AI & ML)**

2023 - 2027

Faculty of Technology, University of Delhi
CGPA: 8.87/10

Academic Projects

- **AI-Email-Agent-LangGraph-Gmail-Google-Calendar-LLM**

Built an AI-powered Email Agent using LangGraph, LangChain, and an LLM with Gmail, Google Calendar, and web search integration. The agent analyzes emails, generates context-aware replies, and supports human approval through a modular workflow.

- **Attention-Based Image Captioning Model**

Implemented a deep learning image captioning system using CNN and Attention mechanisms, generating context-aware captions with **85%+ semantic accuracy**.

- **Legal Document Automation System**

Automated end-to-end legal document processing, reducing manual workload by **80%** and processing documents **5× faster** than traditional workflows.

- **AI-Based Grievance Management System**

Built an AI-driven grievance management platform using **Microservices Architecture** achieving **90%+ complaint classification accuracy** and **70% faster grievance routing** through NLP-based automation.

Notable Achievements

- Secured **1st place** in the **CodeFOT Data Structures & Algorithms (DSA) Competition**, conducted by IEEE.
- Achieved a **top 10%** ranking among **1,000+** teams at **DTU Execute 4.0** Hackathon through the development of a practical and scalable technology solution.
- Solved **650+** Data Structures and Algorithms (DSA) problems on **LeetCode** using **C++**, strengthening expertise in algorithms, data structures, and problem-solving.
